

**Focused Test, Inc. (FTI) invites you to stop by our booth at this year's WIPDA workshop being held at the Sonesta Redondo Beach & Marina, California on November 7-9 2022.**

**FTI will demonstrate the FTI 1000 test system configured to perform:**

- **Dynamic Rdson test of GaN HEMT**
- **UIS production test and TDDB reliability test of SiC Mosfets.**

**FTI 1000's flexible architecture provides a high degree of scalability for a wide range of power discrete and IC test applications, and offers major reductions in cost of test.**
